

Abstract of the Disclosure

An electronic shipment planner is adapted for electronically presenting shipment and scheduling information to a user. The shipment and scheduling information includes at least one shipment event date. The shipment planner is linked to a shipment data repository containing shipment and scheduling information. A system interface communicates with the shipment data repository. An interactive shipment data link is electronically associated with the shipment and scheduling information, and cooperates with the system interface as commanded by the user to access and retrieve the associated shipment and scheduling information contained in the shipment data repository. A calendar display interface displays the shipment planner to the user in a calendar format, such that the interactive shipment data link is provided on the shipment event date associated with the shipment and scheduling information.
